

Ordination of maunga on GBI for JO

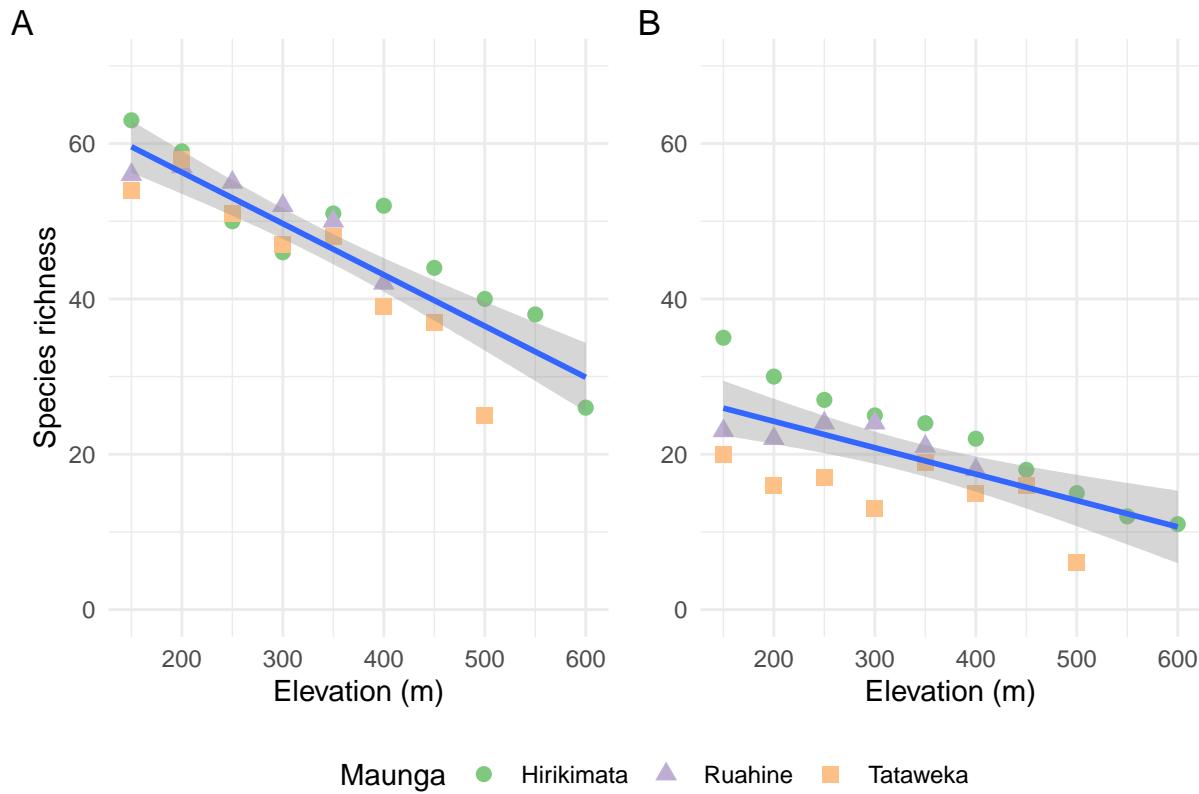

Map of GBI

Figure 2 = map (to be tidied)

Summary of species richness trends with elevation by site for the woody and ferns

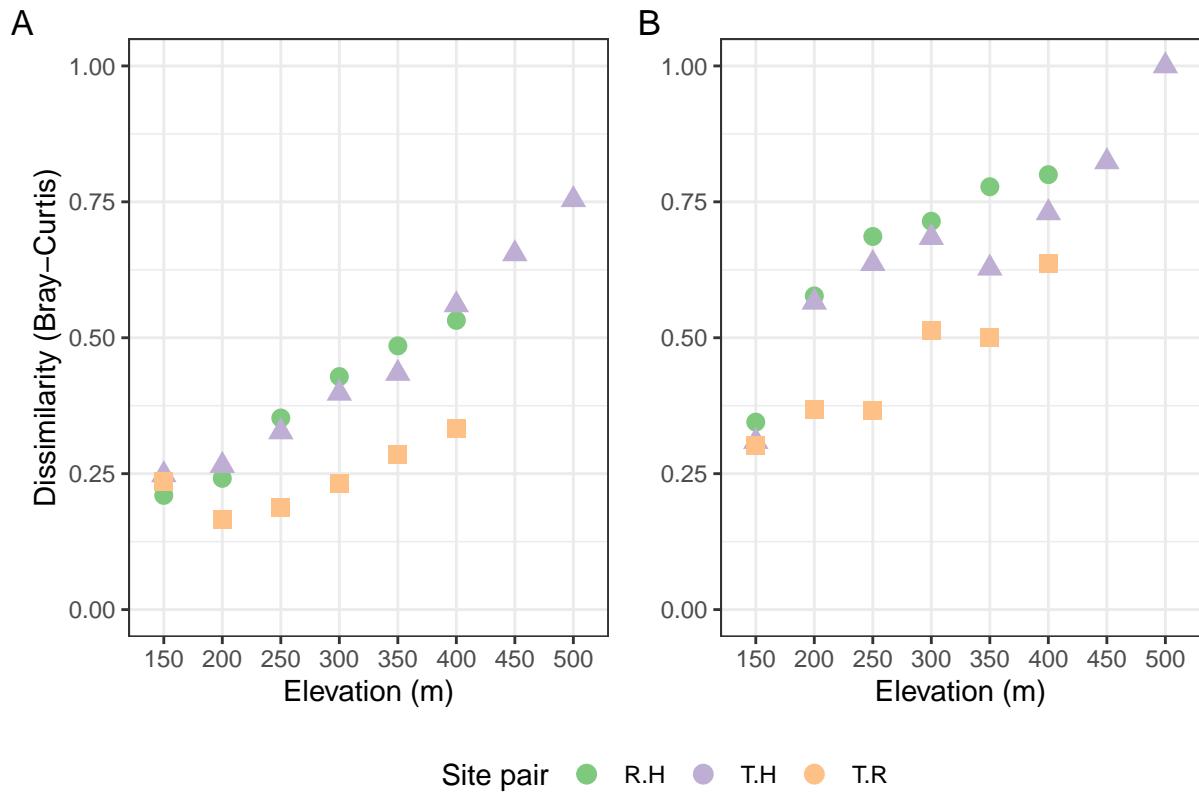

This will be Figure 3

Pairwise differences of sites (different mt)

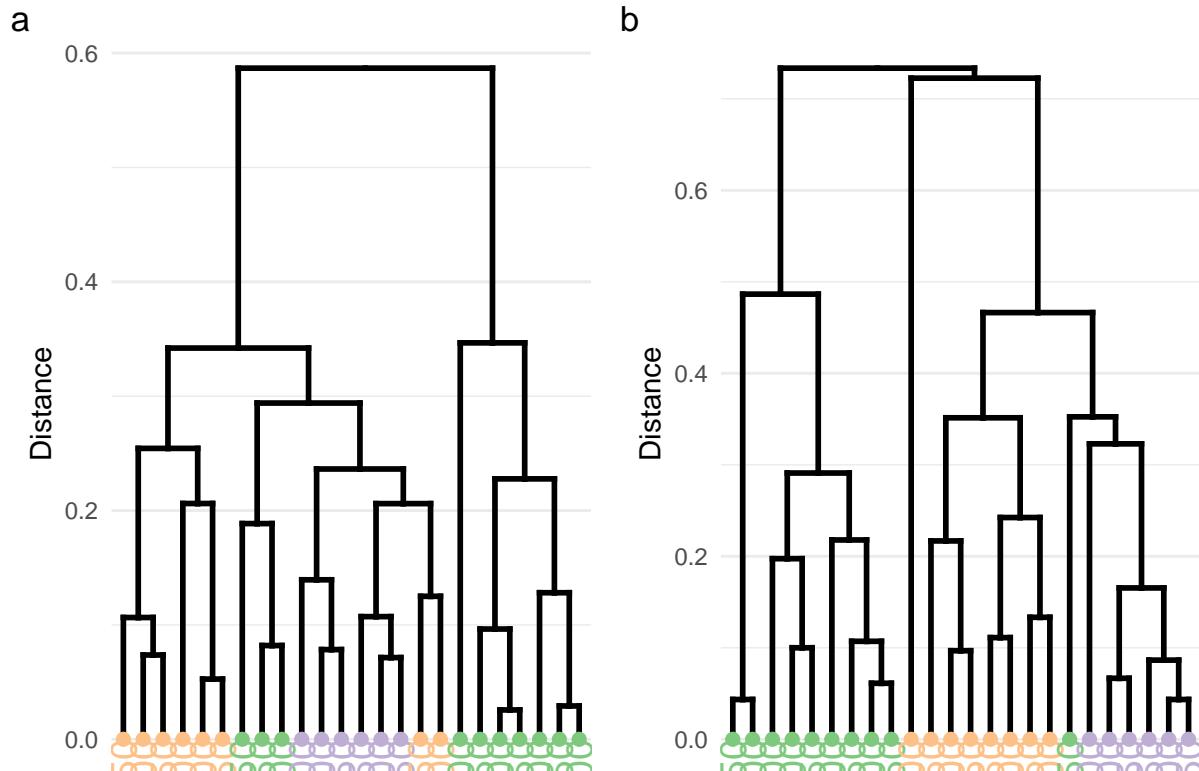

This will be Figure 4

also

Hierarchical classifications for the woody and ferns

This will be Figure 5

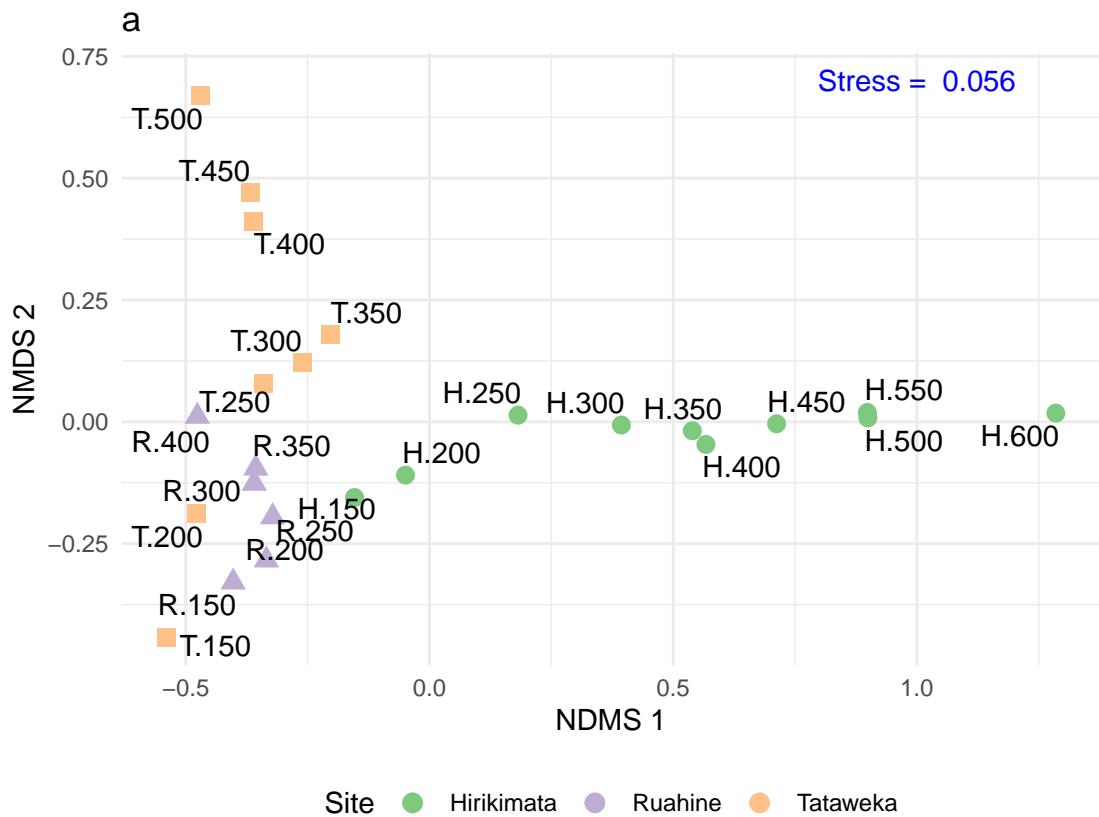

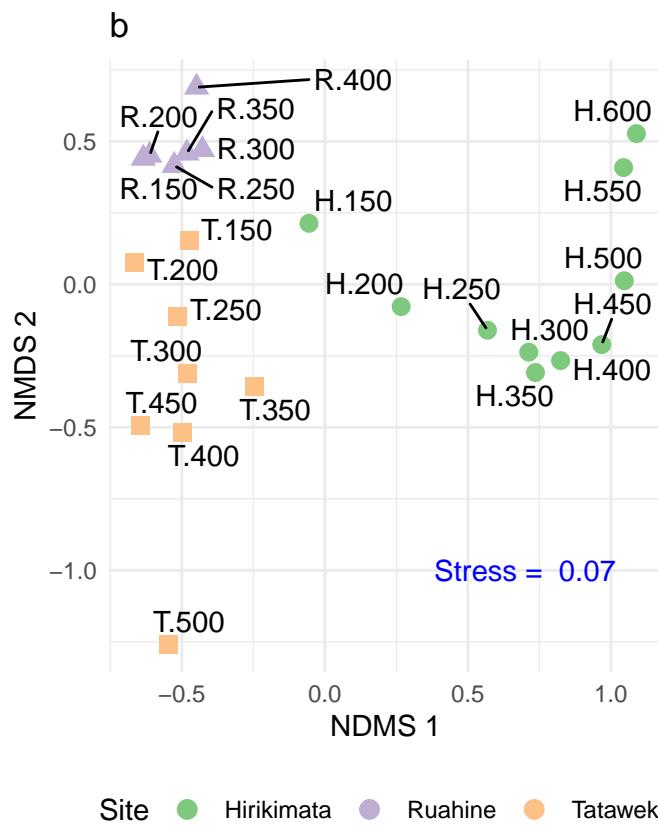

Ordination (nMDS) for the woody species

This will be figure 6a

Ordination (nMDS) for the ferns species

This will be figure 6b

Range barplots

Plots of the ranges of (a) woody species and (b) ferns on Hirakimata *only* and all three sites at an elevation of 150 m to 500 m (lower bnd, upper bnd) -> “lowland” species
